REPORT
About the actions performed in framework of the 1-3rd stages of the project “Atlas”

In the first stage of the project “Atlas” (Contract No.69 dated to July 25, 2007) included the analysis, the systematization and the statistical processing of the results of WBC measurements performed by the IRS “Belrad” from 2001 to 2007 in Bragin, Buda-Koshelevo and Vetka districts.

In accordance with the project the following actions were performed in the first stage of the work:

• The concept of Atlas was developed.
• The table of contents was discussed and developed.
• There was performed the systematization of the results of measurements performed from 2001 to 2007 in Bragin, Buda-Koshelevo and Vetka districts of Gomel region;
• In grand total 28199 measurements were processed;
• There were built maps of $^{137}$Caesium radionuclide’s deposition in children in Vetka, Bragin and Buda-Koshelevo districts.
